The screenshot shows a web interface for configuring a Bridge Conference. The window title is "Bridge Conference". There are three tabs: "Created", "Add New", and "Scheduler". The "Add New" tab is active. The form contains the following fields:

Conference ID	9790
Password	2486
Admin PIN	5595
Conference Name	
Conf By	--Select Value--
Conf Purpose	
Type	-- Select --
Authentication	Mobile
Start Time	yyyy/mm/dd hh:mm
Trunk	--Select--

At the bottom left of the form is a blue "Submit" button.

Our bridge conference feature allows for remote voice meeting where each participant dials himself into virtual meetings from a phone. the system can also make outbound calls admit participants in the same conference, so it can be a mix of both inbound and outbound participants.

MULTI PARTY CONFERENCE

- Unlimited members
- Conference recording
- Option for conference initiator to step out of it

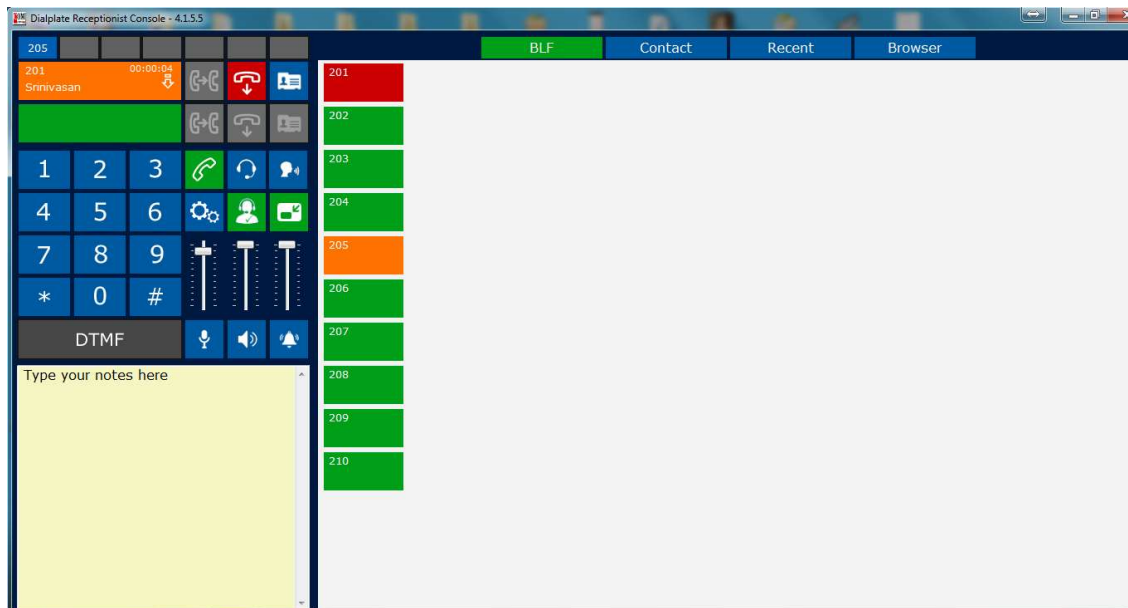

SMS ALERTS

- Missed call alerts
- unanswered calls – we tried calling you, appreciate a call back
- abandoned calls- all our executives are busy right now, will call back asap
- if an incoming call is missed, the caller gets an sms informing of a call back soon

WATCHGUARD

- Wondering whether your paid security is awake at the crucial night hours
- Our system can dial the security extension every selected hour randomly
- The reports of all calls attended or missed can be emailed to authorized personnel
- This facility can also be used to track employee's availability on desk in work from home scenario

PC BASED OPERATOR CONSOLE

- 8 KEYS
- 250 BLF KEYS
- UNLIMITED CONTACT DETAILS ENTRY
- NOTES SECTION FOR EACH CALL
- Red - busy, Green - Free, Orange – Ringing

CALLER-ID BASED CALL TRANSFER

True IPPBX offers two kinds of CBCT

One where we tie up an extension with a number, so whenever the call comes in from this number it will be diverted to the tied extension directly.

Second is where the general pilot number is assigned to extns in an organisation with many employees. Suppose a call is made from an extensions and goes unanswered, on returning the call neither the operator nor the caller will be aware exactly who had called. In such scenario, our system stores the extn-number link so that the call gets diverted to that particular extension only.

VOICEMAIL

Voicemail allows for callers to leave messages in the event the user is busy, unavailable or unable to take the call.

An instant email of this message is then sent to the user as an attachment who can either retries/transfer or delete it.

Advanced Day/Night mode option

In addition to manual day/night mode True IPPBX offers options to schedule a particular day or time to night mode, say festivals when offices remain closed or half-days on Saturday and unscheduled holidays as well.
